

30

Process for preparing water-soluble or water-dispersible polyether-containing polymers and the use thereof as coating agents, binders and/or film-forming excipients in pharmaceutical dosage forms or packaging materials or as additives in cosmetic, dermatological or hygienic preparations

Abstract

10 A process for preparing graft copolymers of polyvinyl esters by polymerization of

a) at least one vinyl ester of aliphatic C_1 - C_{24} -carboxylic acids in the presence of

15

b) polyethers which are solid at room temperature and have the general formula I,

c) and, where appropriate, at least one other monomer

20

using a free-radical organic initiator system, wherein liquid polyalkylene glycol is used as solvent for the free-radical initiator system (feed).
